The only welcome potato milk, recently has been firstly sold on the market. Although some people noticed the potato milk when it was sold, the success of this “milk” still needs time, as some people who have tried it said that it tasted so so, others thought that it tasted a little salty.

But growing potatoes needs less land than growing oats, and it requires little water. Also it has more production than most plants. The new healthy drink may have a huge hill to climb, but it certainly has a chance to become the next big thing.
